HELPFUL TIPS

Installing a shut off valve ahead of your Whole House Cartridge System makes maintenance easier.

STOP

No shut off valve? Shut off the water to the home prior to replacing the cartridges.

HELPFUL TIPS

Use the QR Code on your system to order replacement cartridges.

Whole House Cartridge Replacement CWH-1, CWH-2, and CWH-3

Removing the Old Cartridges

Required parts and tools.

Spanner Wrench

Bucket
(Recommended)

1) No shut off valve? Turn off the water to the home prior to changing the cartridges.

2) If you have a shut off valve, use it to turn off the water flow to the Whole House Cartridge System.

3) Open the cold water valve on a bath tub faucet to purge any pressure from your system.

4) It is recommended to use a bucket to catch water spillage when replacing cartridges.

5) Slide the spanner wrench over one of the cartridge casings and turn it counter-clockwise to loosen it. Repeat with each cartridge casing.

6) Unscrew each cartridge casing by turning it counter clockwise until it is fully removed.

7) Remove the old cartridge and discard it into the bucket.

8) Repeat with all cartridge casings. Remove and discard the old cartridges.

9) All cartridge casings and cartridges removed.

Whole House Cartridge Replacement CWH-1, CWH-2, and CWH-3

Replacing the Cartridges

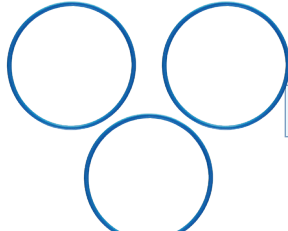

Required parts and tools.

Spanner Wrench

1 Silicone Lubricant per casing

1 O-Ring per Casing

Cartridges will vary by system

5 Micron Sediment Filter Cartridge

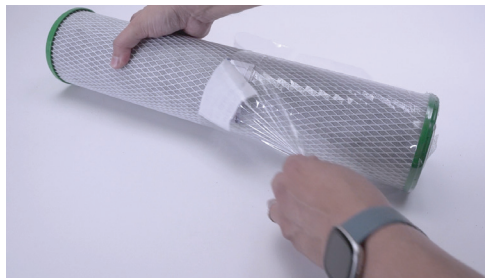

5 Micron Sediment Salt Free Cartridge

Carbon Cartridge

VOC/Lead Cartridge

Cartridge Casings

10) Remove the packaging from each cartridge.

11) Insert each cartridge into a cartridge casing.

Correctly Seated

12) Cartridges will be slightly recessed when properly seated inside the cartridge casing. Repeat with all cartridges and cartridge casings.

13) Apply silicone lubricant to the O-ring at the top of the cartridge casing. 1 lubricant is provided per cartridge. Repeat with each cartridge casing.

14) Use a finger to evenly spread the silicone lubricant around the O-ring. Repeat with each cartridge casing.

15) Insert the cartridge casing w/cartridge into it's designated position (Listed on Mounting Bracket) and thread by turning clockwise.

16) Use the spanner wrench to fully tighten the cartridge casing w/cartridge.

17) Repeat with each cartridge casing w/ cartridge. The cartridges are now replaced.

18) Restore the water to the home and allow water to flush through your new cartridges for 10 minutes.
